County Specific Information

Foreword

The Property Tax Division Tax District Booklet is published annually for the benefit of several public and private agencies. County Assessor offices utilize the booklet for the proper placement of tax codes in the statewide Computer Assisted Mass Appraisal system. State Assessed Property Owners (i.e., mines and mining claims, pipeline companies, electric utility companies, railroad companies, telephone/telegraph companies and other public utilities) use the information to file annual reports for Property and severance tax purposes. Several Divisions within the Department of Revenue reference the booklet for excise, severance and property tax purposes.

The Property Tax Division officially certifies this booklet for use for the 2021 tax year. All additions and changes reflect information collected up to the January 1, 2021 assessment date. If you have any questions regarding any portion of this booklet, please contact the Department of Revenue, Property Tax Division.

1. Wyoming Statutes

The Property Tax Division operates its tax district program in accordance with the following Wyoming Statutes:

39-13-104(m) Limitations on taxation by new taxing entities; reorganizations.

(i) A governmental entity authorized to levy general property taxes which is formed or organized or which expands its geographical boundaries after January 1 shall not make a tax levy upon the new jurisdictional area for that calendar year. Neither shall the commissioners of the county where the new jurisdiction is located levy on behalf of the taxing entity against property in the new jurisdictional area under the same circumstances;

(ii) Taxable property located within an area subjected to a reorganization between like taxing entities is subject to taxation by the entity with controlling jurisdiction

39-13-102(p) Legal descriptions and maps for new taxing entities.

Any governmental entity with authority to levy or require the levy of property taxes which is formed or organized or which changes its geographical boundaries shall cause one (1) copy of the legal description which is contained within the document authorizing formation or modification of boundaries and one (1) copy of an official map designating the geographical boundaries as formed or changed to be filed with the department and with the county clerk and county assessor in the county or counties within which the entity is located within ten (10) days after the effective date of the formation, and annually, by a date determined by the department, if a governmental entity has changes to its geographical boundaries by annexation, enlargement, merger, consolidation, exclusion or dissolution.

Failure to file the required documents within the required time relieves the county assessor and the department from responsibility of modifying the assessment roll to reflect the property in the new entity or changed boundary area.

2. Wyoming Department of Revenue Rules

The Property Tax Division also operates its tax district program in accordance with Departmental rules and regulations. Chapter 9, Section 10(b) reads as follows:

(b) The Division shall assure that all tax district boundaries in the state of Wyoming are created on a uniform set of tax district maps that can be easily reproduced and distributed. When these tax district maps are complete, each County Assessor shall, with the assistance of the taxing bodies, confirm the tax district boundaries in accordance with W.S. 39-13-102(p).

3. Reporting Requirements

It is the Department's responsibility to determine if an entity has submitted the required documentation. All entities with the ability to levy are required to file the following documents: an acceptable forming document, a written legal description and/or boundary map. A "compliant" entity has an acceptable forming document, a written legal description and/or boundary map. All "non-compliant" entities will be noted in the Tax District Booklet.

The Department shall determine those entities compliant or non-compliant with the rules as of January 1. The consequence for a "non-compliant" special district is a possible refusal of their tax levy by the County Commissioners.

Municipalities, school districts and community college districts have the same reporting requirement. However, "non-compliant determination" will not affect the County Commissioner's approval of their tax levy. If critical information is missing from their file, the state and/or the county assessor cannot accurately identify and map the district boundary. This will have a negative effect on the county's ability to collect and distribute property tax revenue correctly. Moreover, inaccuracies in boundary information may cause some property owners to overpay or under pay on their overall tax liability.

County Specific Information

The Tax District Codes described in this section reflect those taxing entities that share a common geographical boundary. The tax district codes are, in essence, an in-depth legend for individual tax district maps. This data is separated by county and is in numeric sequence by the tax district designation number. Each subsequent tax district entity is listed in alphabetical order for ease of reference. Please note, due to their geographical uniqueness, only those districts defined as "Special District Levies" have been individually recorded.

Tax District Map information is available online at the Property Tax Division's website located at <http://wyo-prop-div.wyo.gov/tax-districts/maps-gis-data>. The site includes links to the Wyoming Statewide Parcel Viewer which includes a searchable tax district layer. GIS data is also available for downloading under the 'Tax Authority GIS Shape Files & Metadata' folder. If you require assistance, please contact David Chapman, Manager, Technical Services Group at (307) 777-5289 or email at dave.chapman@wyo.gov.
